

SHERIFF ASKS STATE TROOPS

Strike At Kenosha Tannery Brings About Shooting And Rioting Today.

THREE MEN SHOT DOWN ALREADY

Fifteen Hundred Men Parade Streets--Troops At Camp Douglas Ordered To Be Ready To Move At Once.

(BY ASSOCIATED PRESS.)
Kenosha, Wis., July 22.—In a riot this morning at the works of S. R. Allen's Sons Tanning company, three men were shot and several others injured, some seriously. A thousand men have gone on a strike for an increase in wages.
Riots Start.
The riots started with the opening of the big plant today. At this time a committee representing the strikers was in the general office of the company seeking to make a settlement of the difficulty, but the management called off all negotiations and escorted the committee out of the office, while the officials and deputies armed themselves for protection.
Crowds on Streets.
The crowds of strikers are parading the streets and many of them are armed. In all, fifteen hundred men have joined the ranks of the strikers. The sheriff has asked Governor Davidson for troops to protect property and the lives of the employees remaining at the tannery.
Waiting Orders.
Camp Douglas, Wis., July 22.—Governor Davidson has ordered the troops to hold themselves in readiness to leave at once for Kenosha, but will not dispatch them there until he hears further from the Kenosha authorities.

POLITICAL ACTIVITY TO BE CLOSELY QUESTIONED

State Civil Service Commission Makes Sudden Move In The Game Wardens' Troubles.

(BY ASSOCIATED PRESS.)
Madison, Wis., July 22.—Last political activity, solicitation or contribution to political campaign funds, "outfitting" of expense claims against the state, devotion of state paid time to political work, and similar conduct out of harmony with the letter and spirit of the Wisconsin civil service law, will be made the occasion for separation of scores of deputy game wardens from the service.
The state civil service commission today promulgated a set of questions to the temporarily appointed deputies, sixty in number, which inquire most pointedly into the past conduct of the deputies with reference to political work, solicitation and contributions to political campaign funds, performance of political and other non-departmental work in time and at the expense paid for by the state, and upon the answers to these questions depends the continuance of the deputies in the service.
This treatment will be applied to all of the 107 men who have been serving as deputy fish and game wardens and who wish to continue to draw pay and allowances.
Chief W. A. Hickman caused the matter to be officially placed before Attorney General Gilbert for an opinion on the question of whether the civil service commission was acting within its power and whether deputy wardens could be required to answer such questions.
Attorney General Gilbert held this afternoon that the civil service commission was acting within its power and whether deputy wardens could be required to answer such questions was unusual.

TEACHERS' SESSIONS DRAWING TO A CLOSE

Institute Will End Tomorrow—Patrol Instructor Lectures on Play Today.

Tomorrow the Teacher's Institute, which has been held at the high school building for the past two weeks, will be brought to a close. The institute has been the largest ever held in the history of the county and few in the state exceed it in size. The total enrollment at the sessions was one hundred and eighty-two teachers, of whom a large percentage, eight in number, were instructors who will begin teaching at the next term of school.
The success of the school has been commensurate with the size. In the amount of work accomplished and in the interest which has been shown by the leaders and by the teachers in co-operating with them to get the best results in the allotted time, nothing more could be desired.
This afternoon at three o'clock, work for the day was suspended to allow the teachers to hear Mr. H. W. Root, of Madison, patrol instructor of the Wisconsin Department, G. A. R., who gave a fine, stirring talk on "The Flag."
Tuesday night there was an illustrated lecture on "The Beautifying of School and Residence Grounds," by Orville Bright of Chicago. Mr. Bright is supervisor of the schools of Cook county and it is said that the institutions of learning of Cook county are in better condition than any others in the state of Illinois.

Indianapolis, Ind., July 22.—Leaders of organized labor in the United States, Canada, Porto Rico and Hawaii took part in exercises held today at the dedication of the new national headquarters building of the United Brotherhood of Carpenters and Joiners of America. The building is a commodious three-story structure, located in East Michigan street, in addition to housing the United Brotherhood of Carpenters and Joiners, the building will also be used as international headquarters for the Journeymen Carpenters International Union and the International Brotherhood of Teamsters.

OREGON MURDERER SEEKS HIS FREEDOM

Appeal Of Abram Hembree, Twice Convicted Murderer, Comes Up In Oregon Supreme Court.

(SPECIAL TO THE GAZETTE.)
Salem, Ore., July 22.—The appeal in the case of Abram Hembree, the Tillamook county murderer, came up for hearing today before the state supreme court. Few criminal cases in this section of the country have attracted more widespread attention than that of Hembree, who belongs to one of Oregon's pioneer families. In January, 1907, he was arrested and accused of having murdered his wife and his 10-year-old daughter; of having chopped their bodies up, burned the heads in the kitchen stove, and setting fire to his home to hide the evidence of his crime. He was tried twice. The first time a verdict of manslaughter was rendered against him for the death of his wife, and the second time he was found guilty of murder in the first degree for killing his daughter.

DAMAGE IS HEAVY FROM CLOUDBURST

Loss In Duluth Alone Will Reach Million and a Half—Three Are Drowned.

(BY ASSOCIATED PRESS.)
Duluth, Minn., July 22.—Following the terrific rains of Tuesday, last night's cloudburst caused a scene of devastation in Duluth today. The loss as now computed will reach \$1,500,000. Three children were drowned during the storm.
At Ashland.
Ashland, Wis., July 22.—The flood situation is worse here today. Nothing has been heard from Odanah since three o'clock this morning and a special train has left for that place.
Steel Bridges Swept Away And Town Of Odanah Cut Off From All Outside Communication.
(SPECIAL TO THE GAZETTE.)
Ashland, Wis., July 22.—The situation in the flood district is worse today. The railroad bridge and all other bridges are believed to be swept away at Odanah. Nothing has been heard from that place since 3 o'clock this morning. A special train has left for Odanah carrying boats and men. Boats have also left for the mouth of the Bad River to pick up refugees. Six bridges are down on the Menominee river, five of them steel structures. 4,000,000 feet of logs were swept into the lakes at Montreal. Train service on all roads is considerably delayed.

BEER-MAKERS WALK OUT IN GREEN BAY

Advance In Wages Asked by Brewery Employees Is Refused And Men Leave Work.

(SPECIAL TO THE GAZETTE.)
Green Bay, Wis., July 22.—The men employed by the three breweries struck this morning for an advance in wages and shorter hours. The chief trouble was with the firm which asked for an eight-hour shift and an increase over \$16.25, which they now make per week. Several meetings of the owners of the breweries have been held but the breweries have not heeded the demands of the employees, and the warpath has been the result.

MERRY DRUMMERS IN SESSION IN CHICAGO

National Travelers' Association With Hundreds Of Delegates Attending Opens Today.

(SPECIAL TO THE GAZETTE.)
Chicago, Ill., July 22.—Hundreds of traveling men from all parts of the country are attending the second annual convention of the National Travelers' Association of America, which began its sessions today at the Palmer House. The gathering is one of the largest and most notable of the kind that has ever been held here. Among the scheduled speakers are Charles Nagel, Secretary of Commerce and Labor, President Benjamin F. W. W. of the Rock Island railroad, Governor Denney of Illinois, and Edward M. Steinhilber, president of the Chicago Association of Commerce. The gathering will conclude Saturday night with a great banquet at the Auditorium.

NEGRO TO DIE ON GALLOWS FOR CRIME

Fiend Who Assaulted White Girl In Mississippi Is To Be Hung In Public Tomorrow.

(SPECIAL TO THE GAZETTE.)
Brandon, Miss., July 22.—Hundreds of visitors from the surrounding country are preparing to come into town tomorrow to witness the public execution of a fiend who assaulted a white girl. The man, named Mack, the negro, for whose protection from threatened mob violence Governor Noel called out the state troops last month. Sheriff White has completed all preparations for the execution. The gallows has been set up in an open space between a view of the hanging for as large a crowd as may assemble.
The crime for which Mack is to pay the death penalty was an assault committed upon a white girl, Miss Mamie Myers, in the vicinity of Polahatchie, Rankin county, last November. After the crime the negro made his escape to Marshall county where, under an assumed name, he hired out to Dr. A. M. McAuley. Later he went over to Tate county on a short visit and was recognized by some of the county officers. A few days later the officers called upon Dr. McAuley and informed him that they wanted a negro who was working for him, and asked him to assist them in capturing him, stating that they had shot him in an effort to capture him the night before. On returning home the physician found Mack sitting on his office steps. Mack asked him if he would not dress his wound, saying that he had shot himself accidentally. After joking the negro some the physician shot him in a crum game and had carried him into his office and lay on a table so he could dress the wound. As soon as the negro was down the physician signaled the officers, who took him into custody. At the time of the arrest and trial Governor Noel ordered troops to the scene as a measure of precaution. No attempt was made at lynching, however, though it was thought best to remove the negro to the Vicksburg jail to await the date of execution.

HURRICANE IS FELT THROUGHOUT STATE

Whole State Of Texas Suffered From The Tropical Storm Of Yesterday.

(BY ASSOCIATED PRESS.)
Houston, Texas, July 22.—The West Indian hurricane, which touched Galveston yesterday, made itself felt in the interior of the state last night, badly demoralizing all telegraphic communication.
The report from Galveston today says the only known dead are ten persons swept off the turpin fishing pier. The other coast towns report the floods have subsided with minor damage.
Houston, Tex., July 22.—An unconfirmed report states that a pleasure yacht with ten persons aboard was sunk in the storm of yesterday in the Gulf. All lives were lost.

SCIENTISTS TO MEET IN CANADA

WINNIPEG GATHERING PLACE OF BRITISH ASSOCIATION.

MANY MEN OF DISTINCTION Will Take Part In Program Which Includes Excursions To Places In Vicinity Of Convention City.

(SPECIAL TO THE GAZETTE.)
Winnipeg, Man., July 22.—The preparations by the local executive committee for the meeting of the British Association for the Advancement of Science to be held here next month are rapidly nearing completion and it is expected that everything will be in perfect order and ready to receive the visiting scientists and invited guests when they begin to arrive here during the early part of August. Many of the distinguished men of science expected to attend the meeting will be the guest of wealthy citizens, while for others many rooms have been engaged at the various hotels and boarding houses. The assistant secretary of the British Association, O. J. R. Howarth, M. A., of Burlington House, London, will reach Winnipeg about two weeks before the opening day of the meeting to make arrangements for the official bureau of the association, which will be housed in the Coronation Hotel. For the sake of convenience the visiting scientists of sections, numbering between thirty and forty, will also be quartered at the Coronation. Mr. and Mrs. Howarth will be the guests of Archbishop Matheson.

The railroads have been very liberal in allowing considerable reductions in fare for the visiting members of the association and arrangements have been made for a number of excursions. Some of these excursions, he that to Cobalt and Sudbury, especially arranged for mineralogists and geologists, will take place during the week before the opening of the meeting.

The meeting of the British Association, which will be called to order on Wednesday evening, August 25, at 8:30, in the Walker Theatre and which will close on the evening of September 1, when the final meeting will be held in the Legislative chamber, Parliament building, will be the 79th annual gathering of the association. This will be the fourth meeting of the organization held outside the British Isles, the previous occasions being at Montreal in 1884, Toronto in 1897 and South Africa in 1905.

At the opening meeting Prof. Sir J. J. Thomson will assume the presidency in succession to Charles Darwin's talented third son, Francis Darwin, F. R. S., who was president of the Dublin meeting held last year. After that day the association will hold a general meeting every day and sectional meetings will be held daily by each one of the twelve branches into which the association is divided for the sake of convenience. Each one of the sections has its presiding officer and secretary. The buildings of the Manitoba and Wesley colleges, the Alexandra, Carlton and Imbister schools, the drill hall of the University of Manitoba and the legislative chamber of the Parliament building have been placed at the disposal of the association and Walker Theatre has been engaged for the opening meeting, evening discourses and popular lectures.

The first evening discourse will be delivered on Thursday evening, August 26, by A. E. H. Tutton, M. A., D. Sc., F. R. S., on "The Seven Styles of Crystal Architecture." On Tuesday, August 31, the second evening discourse will be delivered by Prof. W. A. Hurdman, D. Sc., F. R. S., on "Our Food From the Waters." Popular lectures will be delivered at Walker's Theatre by Prof. Harold H. Dixon, M. A., F. R. S., and Prof. J. H. Poynting, D. Sc., F. R. S.

The association is being patronized by His Majesty King Edward, Earl Grey being vice-patron. The list of vice presidents includes Lord Strathcona, Sir Wilfrid Laurier, Sir Daniel H. McMillan, Hon. R. P. Roblin, A. E. Forget, Hon. Walter Scott, G. H. V. Bulyen, Hon. A. C. Rutherford, James Dunsinville and Hon. Richard McBride.

Among the distinguished scientists who will be present at the meeting are Dr. L. S. Amery, London; Col. R. T. Caldwell, Cambridge; E. C. Cannon, Oxford; Herman L. Fairchild, Rochester, N. Y.; Dr. G. C. Foster, London; Prof. A. S. Gruenbaum, Leeds; D. F. W. Hewitt, London; Prof. Alex. Johnson, Montreal; Prof. A. H. McCallum, Toronto; Prof. E. H. Moore, Chicago; Prof. E. F. Nichols, New York; Prof. E. L. Nichols, Ithaca, N. Y.; and Dr. Alfred Springer, Cincinnati.

WHO COULD REFUSE A FINE NEWMAN BRO'S PIANO?

What Easter Method is There for
Securing One Than Having it
Given to You?

THREE TO BE GIVEN AWAY

By the Gazette on September 4th
You Might As Well
Have One.

It is advisable for every con-
testant to keep an accurate re-
cord of the number of votes he
receives. To the Gazette. To avoid
misunderstanding it is well to
note the number of votes con-
tained in a package, and to in-
sert a slip designating the
amount. Votes are counted ac-
curately, and in case the slip
does not agree with the results
secured by the counters, the
contestant will be notified im-
mediately, thereby saving the dif-
ficulty likely to arise should some
contestant feel she has not re-
ceived credit for the number of
votes due her.

If there is one thing more desir-
able in any home than a beautiful
Newman Bros. piano, such a one as is on
display in the store room of H. M. Nott,
it is hard to judge what it may be.
If there is an easier method of securing
such a valuable and important ad-
dition for any home than by winning it
at the hands of your many friends, and
with their enthusiastic cooperation, it
does not occur to the writer at the
present time.

The Gazette is giving away abso-
lutely free, three of these handsome
instruments, and the persons to whom
they shall be given will undoubtedly
be the most popular and best liked
young women within Jamesville and
vicinity. Everything has been done
to assist some young women to secure
these valuable instruments at our ex-
pense, and The Gazette is now only
waiting to see who will be the most
fortunate girls—the girls with the most
friends and most enthusiastic adhe-
rents.

In this, the second week of the
contest, young ladies who have enter-
ed it have found that they had many
more friends than they ever dreamed
of, and daily the number of votes cast
without the knowledge of these young
women reaches a stupendous amount.
Friends of each contestant drop into
the office of The Gazette during the
day and deposit a large bunch of con-
fession and nomination blanks for their
favorite candidates, and the contestant
is greatly surprised when the next day
to find herself credited with a large
amount of votes than she thought she
had. It is really surprising the inter-
est that everyone seems to be taking
in the contest, and there are many
young ladies who are to be congrat-
ulated upon having such a host of
friends.

The time of the contest manager is
always at the disposal of contestants
or their friends, and he is always
anxious and willing to answer ques-
tions or proper information that will
assist the contestants in any way.
On any point, concerning which you enter-
tain the least doubt, call him up, and
he will explain.

There is a great deal to be gained
by pledging the support of your
friends, and united action is always
productive of better results than
single efforts. Therefore, see every-
one you know, tell them what you
want, and make them help you.

Remember, candidates, that each
and every nomination blank voted
bearing your name adds 25 votes to
your credit, so ask your friends to
save the nomination blanks for you as
well as the coupons.

No Old Papers Sold.
During the progress of the voting
contest old papers will not be sold or
taken from the office. This action is
taken to protect all of the contestants
and insure no unfair advantage on the
part of those who might thus secure
coupons in large quantity.

Open Evenings.
For the benefit of those who cannot
call during business hours this office
and contest department will be open
every evening until 8 o'clock.

NOTICE CONTESTANTS.
All contestants residing east
of Rock River are in District
No. 3; all contestants residing
west of Rock River are in Dis-
trict No. 2. Should your name
appear listed in the wrong dis-
trict notify the contest manager
at once and the correction will
be made. Each contestant's
name must appear in the district
in which she resides.

BRODHEAD BAND TO HOLD A TOURNAMENT

Green County City Will Entertain
Seven or Eight Musical Organi-
zations Next Month.

Brodhead, July 22.—Citizens of
Brodhead will entertain seven or
eight bands on August 25th, at a
County Band Tournament. The Brod-
head Juvenile band will have charge
of the arrangements and will co-
operate with the citizens in giving the
visitors a cordial welcome and see
that they have a good time.

Contractor Smith and a force of
men are here from Beloit to begin
the sinking of four six-inch points
for wells upon the property now oc-
cupied by the pumping station. These
points will be driven to a depth of
sixty or more feet and it is expected
a good quality of water will be found
in sufficient quantities to furnish the
city abundantly for domestic pur-
poses and fire protection as well. It
has been known for some years past
that the flow of our artesian wells
was diminishing perceptibly and the
above is considered the cheapest and
best way out of it.

Mr. G. W. Myers goes the last of
the month to Waukon, Iowa, to accept
the formanship of a printing office.
George is an artist in his line and will
set them a pace in the printing that
will make them go home.

Mrs. O. W. Skinner and children, of
Pecatonica, Illinois, are guests of the
lady's parents, Mr. and Mrs. Fred J.
Smith.

Mrs. Frank Conlen of Juda, is the
guest of her mother, Mrs. Mary Fair-
bank, South Dakota, accompanied by
his sister, Mrs. Smith. They will
spend some time in the west.

Rev. K. A. Ross, of Monroe, will ex-
change pulpits next Sunday with
Rev. G. N. Foster of the M. E.
church in this city. On Sunday morn-
ing there will be love feast at 9:45.
Sermon at 10:45 followed by commu-
nion services. Rev. Ross will speak
in the city park at 6:30, weather per-
mitting, and if rainy, in the church.

Mrs. P. L. Swan and Miss Olive
Brandt of Superior, are the guests
of Brodhead friends and relatives for
a time.

The new switch track which is to
be laid for the new Marty Gold Store
Chicago building soon, the railroad
of steel rails having arrived on Tues-
day. An effort is being made to
have the building August.

Repairs for the naptha launch Nauti-
lus have arrived and been put in
place and the boat is again making
regular trips to the park.

Grant Webber of Monroe, spent
Monday at Decatur park.

Albert Rizzo has purchased the old
Woodie farm in Sylvester, Condi-
dation, \$9,000.00.

J. B. Pierce, A. J. Wagner and Ad-
Plock took part in a shooting tourna-
ment at Milton Tuesday and carried
off the second, third and fourth prizes.

Miss Jacobine Allen of Lake Mills,
who was the guest of Miss Edith
Bowen, departed for home on Tues-
day.

Work for the building which Geo.
M. Pierce will erect for his new power
plant, has begun and will be hur-
ried forward.

M. J. Pudgett, who spent a fort-
night with Mr. and Mrs. E. H. Stuart,
left on Tuesday for his home in Ham-
ilton, Missouri.

Walter Martin was here from De-
laid over Sunday. His mother, Mrs.
W. W. Martin returned home with
him for a short stay.

Capt. and Mrs. A. N. Randall are
entertaining Mrs. Newkirk of Kansas
City.

Mrs. D. M. Leonard of Oberlin,
Ohio, is the guest of Rev. and Mrs.
J. Lloyd Smith. The ladies are sis-
ters.

Mr. and Mrs. H. P. Clarke left last
Saturday for Prairie du Chien, where

they took a steamboat ride to Du-
buque.

Mrs. A. J. Schneider, of Monroe,
was here Tuesday and Wednesday
with her mother and sisters.

J. L. Sherron was here from Monroe
on Tuesday.

Mr. and Mrs. Wash Mitchell spent
"Monday in Jamesville. Also Miss
Sackett.

Shopping Bag Special For Saturday

Something very unusual in bag value
for a mid-summer flyer. We had an
opportunity to buy 10 dozen black
rough leather shopping bags at a very
low figure. These bags are 12 inches
long, leather lined, with inside pock-
et and purse, double strap handles,
trimmed in gun metal or gold. Any
woman would hardly expect to buy
such a bag for less than \$1.50. We will
offer these bags Saturday, choice

Special No. 2 While They Last

We will offer about 500 yards of
beautifully fine white Swiss waisting,
a dainty fancy mercerized stripe. The
stripes are 1 1/2 inches apart, the goods
27 inches wide. These waistings were
made to retail for 25c. We bought a
case of what are known as short
lengths, although there are some
pieces that contain enough to make a
whole dress. You will be pleased with
them. Take advantage of a good
thing. While they last, special

Special No. 3

One bale of fine long-cloth that usu-
ally retails for 18c to 20c per yard.
These also consist of short lengths 5 to
15 yards. These are nice fine quality,
40 inches wide and the price means
quick sale. While they last,12 1/2c

Special No. 4

Lace Dress Nets

These are unquestionably the great-
est bargains in lace nets ever put be-
fore the people. They come in assort-
ed qualities in a variety of weaves, and
in several size dots. All 40 inches
wide and the price at which we offer
them is simply out of all proportion to
their actual worth. Hundreds of yards
have been sold at \$1.00 to \$1.50, our
price, while they last,43c

The Ready Made Sheets

It does not require much talking to
sell these sheets. They are made of
good quality bleached muslin, have pat-
ented fat seam, made by new process.
Sizes 72x90 inches. Buy all you want
of these sheets as they cannot be offered
much longer at our price owing to a
change of market conditions. SPE-
CIAL UNTIL AUG. 1ST.....39c

The Pillow Cases

Size 36x45, are in good demand. We
spoke about them on Tuesday. They
are extra good at our price. By the

Important to Linen Buyers

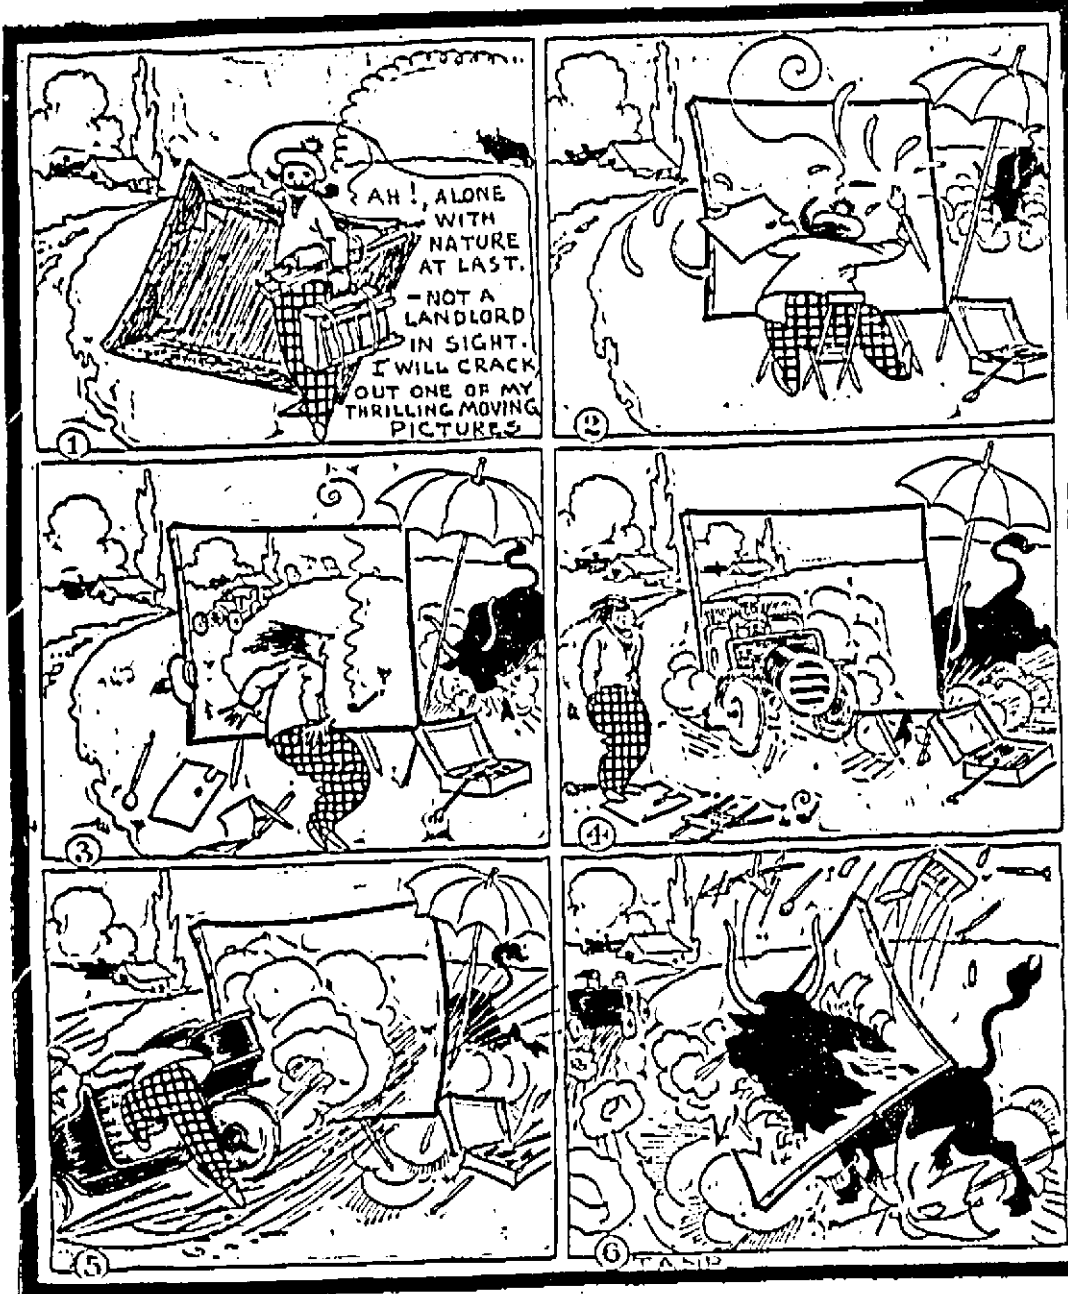

Buy your table damasks, napkins and
pattern cloths until Aug. 1st at a dis-
count of 10 per cent—one-tenth off from
all prices. In pattern cloths we show
8 to 10 different qualities, in practi-
cally every size and style made. It is a
short sighted policy to go to the large
cities for linens—you simply pay fancy
prices for the same qualities. If you
don't take the trouble to look in James-
ville before buying of course we do not
have the opportunity to prove it. Our
stock of beautiful pattern cloths, table
damasks by the yard and napkins is
large enough to satisfy the most critical
buyer. Buy your linens in Jamesville.

HOW TO MAKE SIMPLE STILL

A Contrivance to Distill Water is Made From a Test Tube, Some Hose and a Bottle.

A still to distill water can be made from a test tube, some heavy rubber hose and an ordinary bottle. Secure a stopper for the test tube, and bore a hole through the center, into which fit a small hollow tube. The bottle is also fitted with a stopper containing a hol-

Distilling Water.

low tube, and both bottle and test tube connected with a hollow rubber tube. The test tube is partially filled with water and supported or held over an alcohol lamp. The bottle should stand in a basin of cold water. When the water in the test tube begins to boil the steam passes over to the bottle, where it condenses. The basin should be supplied with cold water as fast as it begins to get warm. The rubber tube will not stand the heat very long and if the still is to be used several times a metal tube should be supplied to connect the test tube and bottle.

NOVELTY IN SAFETY RAZOR.

Latest Improvement Can Be Manipulated Same as Old-Fashioned Unprotected Blade.

The introduction of the safety razor was undoubtedly welcomed by a great many men who found it impossible to shave with the old-fashioned razor without cutting their face. In direct variance with this is the regular fact that those men who formerly used the old-fashioned razor successfully were unable to shave with the safety razor without injuring the face. The difference in the methods of handling the two razors readily accounts for this. A Reading man became acquainted with the fact, and accordingly designed the safety razor shown here, which in form closely resembles the old-fashioned razor, and is manipulated in mostly the same manner. A guard is provided, as in the ordinary safety razor, which is attached directly to the handle, the blade of the razor being detachable,

Used Same as Old-Style Razor, and having two sharp edges. The guard is also double-edged, to protect both edges of the blade. Obviously, as one edge becomes dull the other can be brought into use, and when both are dull an entirely new blade substituted.

Value of Pigeon Post.

The pigeon post is proving a valuable adjunct of civilization, even in these days of fast trains and steamships and wireless telegraphy. The isolated Lighthouse of Maatsuyker Island is 75 miles southwest from Hobart, Tasmania, in a direct line and 90 miles by steamer, and since January 21, 1908, 12 homing pigeons have kept up communication with the mainland, three being regularly liberated every three weeks. The first message left the Lighthouse at ten a. m. reaching Hobart at 1:30 p. m. The service has been generally satisfactory, though not all messages have reached their destination; and it probably saved the life of an assistant at the Lighthouse, as an urgent message brought much-needed medical relief from Hobart in 12 hours.

FUTURE OF GOVERNMENT BONDS.

"The proposed issue of Government
 bonds to meet the reduction in the
 cash balance of the Treasury has
 brought to a head the discussion on
 the rate at which such bonds should
 be issued. The Wall Street Journal
 was among the first to point out that
 the two per cent bonds would be in
 a very precarious position if three
 per cents were issued which were
 available, like other existing issues,
 to secure bank note circulation. The
 practical character of the problem was
 recognized by the National City Bank
 of New York, in its last monthly circular,
 and Congress now appears to be
 ready to face the issue.

"Henceforth, if a large volume of
 three per cent bonds be issued for
 the completion of the Panama Canal,
 or for other purposes, the outstanding
 bonds of the United States should fall
 practically into two classes—the two
 per cents, available as security for
 the old national bank circulation and
 the three per cents, available as a
 safe investment for trust funds and
 conservative private investors.

"The difficulty arising from past
 Government financing is that the two
 per cent bonds are acceptable as investments
 only to national banks and
 are acceptable to them only because
 they are available as a basis for bank
 note circulation. How little the
 bonds are sought by other investors
 is indicated by the fact that of the
 \$730,882,130 two per cents of all classes
 outstanding, on July 1, national
 banks held as security for circulation
 and public deposits no less than \$675,
 150,500. The monetary circulation is
 already overcharged with bank notes.
 If the Government should put out a
 three per cent bond in the near future
 it would not sell greatly above par.
 A bond paying 2 1/2 per cent would
 probably sell very close to par. In
 the face of an issue at such a price,
 there would not be any reason why
 the two should retain their present
 price, just above par. There would be
 every reason why they should fall to
 a price of 90 or less, affecting the
 assets of nearly every national bank
 adversely and affecting some to such
 an extent as to wipe out their surplus.

"The remedy suggested recently by
 the National City Bank—the levy of
 a higher tax on circulation when secured
 by the new three—hardly goes to
 the root of the difficulty. If the
 tax were so high as to be practically
 prohibitory upon the use of the new
 bonds as security for circulation, the
 prohibition might as well be made direct
 at once rather than indirect. The
 present tax is one-half of one per
 cent per year upon circulation based
 upon two per cent bonds and one
 per cent per year upon circulation
 based upon other bonds. Equalizing
 the attractiveness of the bonds for
 circulation by imposing a higher tax
 upon the three would hardly preclude
 banks from taking new three at or
 near par in order to substitute them
 for the two per cents which they now
 hold.

"The controlling motive for such
 action would be that they would find
 the new three more salable, in case
 they should wish to reduce circulation
 or change the character of their
 investments. It is conceivable that a
 proposition merely to equalize the
 net value of the two classes of bonds
 for purposes of circulation would result
 in a panic in the market for
 two's. There might be a scramble to

get out from under the two's to re-
 place them with three's, which would
 cause more violent fluctuations in the
 market for United States bonds than
 have occurred for many years.

"It is obvious from these considerations
 that the Republican leaders in
 Congress will take the only safe
 course in deciding that future issues
 of three per cent bonds shall not be
 available to secure bank note circulation.
 It will be a long step towards
 the divorce of our banking system
 from the public debt and will clear
 the way in a large measure for the
 adoption of a flexible currency based
 upon commercial transaction. Under
 existing conditions, it should prove
 fortunate that a sound bond policy is
 in sight, even if more comprehensive
 plans cannot be carried through be-
 fore the next session of Congress.

CONQUEST BY PENNIES.

The Denver mint has taken to
 colden pennies to supply local de-
 mands in the far west. The old
 nickel-or-nothing habit is disappearing
 beyond the Missouri. It has
 followed the disappearing geographical
 entity and state of mind known as
 "the frontier."

That tariff on hides which was al-
 taring so haughtily on its porch will
 have to come down.

There may be people, however, who
 prefer to have their all-wool suits
 made partly of cotton.

Senator Aldrich may have noticed
 that he president is getting all the
 popular applause.

Boston's pensions for old maids are
 all right, provided the old bachelors
 have to pay them.

Korea now is so well trained that
 it agrees cheerfully to anything Japan
 suggests.

Mr. Taft thinks he sees unmistakable
 signs that congress is coming
 through.

According to the woman's page a
 little cold cream will be good for the
 sunburn.

Evidently a tariff conference is
 different from a Sunday school picnic.

Tariff uplifters suspect that President
 Taft can deliver the goods.

Secretary Wilson still thinks the
 crop statistics are safe and sane.

A MODERN HEROINE.

When one essays to tell the story of
 Mrs. Hooke, the heroine of the New
 Mexico flood, one feels much as the
 old school poets must have felt when
 in their opening stanzas they prayed
 the muse to help them.

But the story deserves a wider tell-
 ing than has been given it.
 It is a thoroughly modern happening
 —a telephone tale—and has no parallel
 in literature or real life.

Mrs. Nellie Hooke was the toll opera-
 tor at the long distance exchange at
 Folsom, N. M., the valley town that
 recently was swept away by the flood.

As operator she got the first tidings
 of the approaching waters.
 Mrs. Hooke had time to escape after
 warning the people of Folsom, all of
 whom escaped up the hillside. Her
 frail wooden station stood directly in
 the path of the flood.

But—
 In the valley below were scores of
 families—subscribers of her company.
 It was night, and men, women and
 children there in the lowlands were
 asleep.

Along the brave woman sat by her
 wire, calling up the hamlets and farm-
 houses. Scores of families fled to the
 hilltops, warned by the telephone.

Mrs. Hooke had called nearly all the
 numbers on the switchboard when the
 morning roar of the flood was heard
 above. There was yet time to get
 away. But the operator would not
 leave her post of duty and danger until
 the last subscriber was warned.

And then—
 The wall of angry waters twisted the
 little telephone station into kindling
 wood. The next day down in the
 canyon many miles away the body
 of the little woman was found wedged
 between the rocks. Somehow the waters
 had been kind, and the body was
 not mutilated or the face marred.

And—
 Here, too, was her operator's head-
 piece with a twisted strand of wire
 pressing into her wet hair, mute witness
 of her last kind occupation!

And these things should be told of
 her for a memorial. Because—
 She died for strangers, doing what
 she did without applause and as though
 it were her daily task to choose be-
 tween death and duty. Because—

The story of her quiet heroism re-
 newes one's faith in the high calling of
 the race. It justifies the creation of
 men and women. It reveals the near-
 ness of that spirit place—from which
 the veil thinly separates—where there
 is no more struggle between love and
 duty.

The Argument.
 "When you come to figurin' in do
 loss of time, temper an' mobbe friend-
 ship," said Uncle Eben, "it's mighty
 hard for anybody to say for certain
 dat he has had do best of an argu-
 ment."

Womanish.

 fore she is dressed to go out.—Smart

"MOVE ON."
 Typical scene on the streets of McKees Rock, where the 10,000-striking
 Pressed Steel Car company's employees are engaged in one of the most
 bloody and determined strikes in history.

The cause of the strike is a new
 system of pooling wages in the plant,
 which the men declared has reduced
 their earnings from 25 to 30 per cent.
 They say they do not know what
 amount they are to receive until they
 open their pay envelopes. The system
 makes a flat rate for the rivet-
 ting of a complete car, and those who
 work on a car share alike in the divi-
 sion of the money.

Six hundred foreigners in the rivet-
 ting department became dissatisfied
 with the new wage system and quit
 work. Then they made a demonstra-
 tion and induced others to walk out.
 At 2 o'clock one afternoon the electric
 crane men refused to operate their
 machines and that was the signal for
 all the other men to drop their tools.
 Pipe fitters, machinists, woodworkers,
 construction workers and axle work-
 ers joined the crowds of strikers and
 inside of an hour not a man was at
 work.

Crowds of strikers, determined that
 no one should take their place, practi-
 cally patrolled every street in
 Schenckville and surrounded the hu-
 manity car manufacturing plant. Every
 street car crossing the McKees Rock
 bridge from Island avenue was held
 up and several passengers, mistaken
 for workmen going to the plant to
 work, were dragged from their seats
 and beaten.

Last night it was said that the com-
 pany was in control of the situation
 so far as the works were concerned,
 and with the enlargement of the force
 of guards, both in numbers and equip-
 ment, it was thought that no further
 trouble would occur within the yards
 or on the property of the company.

PRESIDENT TAFT'S GUARDS AT THE SUMMER CAPITOL.
 J. D. George, President Taft's chauffeur, the superintendent of the
 estate and a special detailed policeman of the Beverly police force.

Beverly, Mass.—The city fathers
 appreciate fully the honor conferred
 upon them by the selection of
 Beverly as the summer home of President
 Taft. The proper protection
 of the president has been giving them
 much concern, just as it always does
 those at the national capital. The
 president will be accompanied by sev-
 eral members of the secret service de-
 partment especially detailed for his
 protection, but Beverly has also of-
 fered her assistance by detailing one
 of the most competent men on her
 police force as a special bodyguard
 for the chief executive. In addition
 to this the superintendent of the
 estate will keep his weather eye
 open for any loiterers who might be
 open to suspicion and he will be in

close touch with the various secret
 service and city officials.

President Taft's chauffeur is to be
 continually on his guard and Mr.
 George is tried and true. The three
 were photographed in front of the pre-
 sident's summer home last week and
 constitute the president's bodyguard
 for this summer.

To Prevent Boiler Scale.
 Boiler scale is prevented in the
 process of P. A. Lart, an English ex-
 perimenter, by simply passing through
 the working boiler the moderate cur-
 rent of any ordinary dry or wet electro-
 chemical primary battery. The current
 hastens the deposition of solids in
 mechanical suspension and the precipi-
 tation of those in chemical solution,
 and the resulting mud contains only
 loose particles of the lime, magnesia
 or other impurities from the water.
 Tests are suggested to determine the
 working value of this process.

Changes in Comet.
 The changes in progress in a comet
 are now shown on a screen in moving
 pictures. Morehouse's comet was fa-
 vorably situated for observation in
 England during last autumn, and as
 this body gave an unusual opportunity
 for studying changes the astronomer
 royal had photographs made at fre-
 quent intervals so as to obtain a cine-
 matograph record. One series shows
 the alterations that took place in a
 period of about nine hours.

Painless Dentistry

This A. M. a patient said as I extracted a badly ulcerated tooth, "Why, Doctor, that didn't hurt." "Of course not," said I. "Well, that's what I had heard, but I never believed it before."

You may never be able to believe it until you have faith enough to let me do your Dentistry.

It is a pleasure to me to see the look of relief upon my patients' faces when they discover that I really have not hurt them.

I know that my work is good work. I know that my prices are the most reasonable in the city.

My patients tell me that I hurt them the least of any Dentist they ever employed.

And these things are what I aim to keep doing and deservicing.

**EFFECTS OF NEW
LAW FELT HERE**

SCHOOL STATUTE WILL AFFECT
COUNTY.

A SCARCITY OF TEACHERS

To Teach in Schools of County is
Promised As Usual Sources of
Supply Will Be Cut Off.

The summer session of the Teachers' Institute now in progress at the High School, will undoubtedly be the last one held in Rock county and there will be no more short session institutes in Wisconsin. Under the new law passed at the last session of the legislature through the efforts of the regents of the normal schools, all applicants for third grade certificates will have to attend for at least six weeks and receive passing marks at a county training school or a state normal school besides passing the examinations in the regular subjects. Such a certificate will hold good for but one year in the superintendent's district in which it is issued.

Second Grade Certificates.
Those seeking second grade certificates will have to have been a teacher in the public schools for eight months, must pass in third grade subjects and in addition be successful in an examination on physical geography, American literature, English and in the cataloging and use of school libraries. Standings from a third grade certificate may be transferred in force to a second grade certificate if the applicant has taught for eight months, and has attended for six weeks, a professional school for teachers since getting the third grade certificate receiving credits in two subjects. The certificates are in force three years from the date of issue.

To renew the second grade certificate, two years experience as a teacher with six weeks attendance at a professional school are required by the new law, or the applicant may be examined in all the required subjects.

First Grade Certificates.
Besides the eight months' experience as a teacher, the successful passing of second grade certificate examinations, the instructor desiring a first grade certificate must be prepared on the additional subjects of English literature, theory and art of teaching, algebra, physics and English history. Second grade standings may be transferred to a first grade certificate under conditions similar to those required in transferring from third or second grade certificate. A first grade certificate may be renewed by the county or city superintendent for one or more periods of five years each.

Scarcity of Teachers.
In case of a scarcity of teachers occurring under the new law, it is provided that the superintendent of the district in which the supply becomes exhausted, may, with the consent of the state superintendent, issue third grade certificates to as many as are needed to supply the schools. An examination in third grade subjects is required to secure this certificate.

What It Means To Rock County.
About one-third of the school teachers of Rock county are drawn from the high school graduates of each year who begin teaching. The young teachers who secure their certificates this year will not be affected by the law but next year all those desiring to teach will have to go to the normal school. This will mean that there will not be enough teachers for the schools that need them as Rock county has no training school and the normal school, which lasts for a year will be the only place they can attend.

**DRUNKS AND WEARY
WILLIES IN COURT**

Six Sent to Jail for Drunkenness This
Morning—Others Told to
"Beat It."

Eight prisoners, a choice collection of inebriates and wanderers gathered from all sections of the city, faced Judge Field in municipal court this morning, and after telling their stories, six received jail sentences while the other two were allowed to proceed on their way on promise of paying their fines.

Edward Sprandell, of Danville, Ill., whose spindly pair of legs gave the lie to his apparently broad shoulders, gave the officers a sharp chase last night after alighting from the chief's buggy, but was captured before he had traveled any great distance. He drew seven days in jail as his portion in a fine of enough money to pay a fine amounting to \$4.10.

Teddy Holland, stone mason, formerly of Janesville, recently of Rockford, and at present from Madison, was up in court again charged with the old offense—drunkenness. Holland caused the county considerable trouble and expense some time ago by falling down on the stone sidewalk on River street and cutting two bad gashes in his head. After serving time in the Dower City he left for Rockford only to pass through still more trials and tribulations, this time in the matrimonial line.

Finding his wife in the company of an alleged ally, he proceeded to wreak vengeance upon his rival with a knife and was arrested, but was subsequently released as the result of a general petition. Recently he secured a good position in Madison, but while having his union card brought up to date in Janesville, fell into bad company and wound up in court this morning. Sentence was suspended one week on condition that he pay a fine of \$4.10 on Saturday night.

Of the other eight who were crowded, James Kelley, as husky a specimen of the human race as ever stepped, went to jail for four days, charged with drunkenness and begging. Oscar Nelson drew a like sentence for drunkenness; Charles Campbell got four days; Andrew Furlong, seven; while Charles Arner will spend twelve days behind the bars. Jacob Snyder, of Monroe, who gave the impression of being all whiskers and celluloid collar, whose resplendent among his dingy companions, and perhaps on the score of general cleanliness, was given half an hour to get out of town. Two other specimens of the "submerged tenth," Jack Kendrick and William Mills, listened to some straight talk by the chief and were then allowed to "beat it."

Left Unpaid Board Bill in the Green
County City When
He Left.

This morning Chief of Police John Gardner of Brodhead arrived in town with a state warrant for John Smith charged with jumping a board bill at Brodhead last Saturday after quitting his job with the telephone company at that place. Smith, when asked the reason for his action, stated that he had no intention of beating his former landlady out of the money but intended to pay it as soon as he received his first week's pay. The matter was settled when Charles Thompson of the Crystal Lake Ice company, for whom Smith is working, paid the bill, which, with costs, amounted to fourteen dollars.

ELECTRIC CURRENT TO UNVEIL

Insures Removal of Drapery Without
Fear of Lustrous Failure
and Embarrassment.

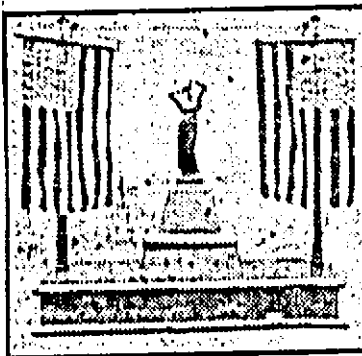

The unveiling of a statue under ordinary circumstances is a very embarrassing occasion, but it is frequently rendered ludicrous by a failure at a very critical moment. Often the drapery which is used to hide the lines of the memorial refuses to respond to the

The Statue Covered.

tugs and pulls given at the cords which were designed to draw the fabric away. This sort of mishap is no less embarrassing than when the material falls of its own accord in advance of the set time, says George J. Jones in Scientific American. Having witnessed several such accidents, an electrical engineer employed in the department of the interior at Washington, set about some time ago to devise some method of performing this operation by the use of the electrical current, so as to render such occasions free from accidents. Recently he announced the completion of his self-assumed task.

The scheme calls for the erection of two poles placed on either side of the monument with a stout wire cable stretched from top to top. The ends of the cable pass down the side of one pole and are secured near the bottom. Held slightly away from the pole, the cable acts as a guide for counterweights. Mounted on the cable are two swivel pulleys, each supporting a wooden staff balanced therefrom. Flags are generally made use of for the purpose of hiding the lines of the statue until such time as it is desired to reveal them to the assemblage, and in the electrical process the bunting is hauled from these sticks. The flags hanging from the sticks completely enclose the statue. The lengthwise edges of the flags are sup-

The Statue Unveiled.

plied with small magnets and corresponding armatures, the magnets being connected in series, and the current from a few batteries is sufficient to hold the edges of the flags together, even in the face of a strong wind. This current is conveyed through a small insulated wire. When all is ready one of a pair of touch-buttons, placed at a convenient point, is pressed. The flags open like a book, and for a few seconds they remain as an effective background to the memorial. The second button is then pressed, and the flags move off under the action of the weights, toward the poles, leaving a free and unobstructed view of the statue.

The inventor of this scheme had an ambitious desire to put the scheme to a severe test at the unveiling of the Franklin statue in Paris. He submitted a plan to the American ambassador. His suggestion was that the ceremony be made a double one, the actual unveiling of the statue being done at Philadelphia, Pa., at the meeting of the American Philosophical society, by some distinguished electrician who might attract the gathering or by some of the descendants of Benjamin Franklin, several of whom are still residing in that city. There was not sufficient time, however, to make the necessary arrangements, which would require much correspondence.

To Determine the Kind of Current.

At times it is necessary to know whether the current in a circuit is alternating or direct, and as the generator may be miles away at the other end of the line an easy method of determining this on the spot is desirable. A reader of Popular Electricity suggests the following method: Hold a small magnet near an incandescent lamp burning on the circuit. If the current is alternating the filament will vibrate. If it is direct the filament will bend slightly toward the magnet but will not vibrate.

North Pole Expeditions.

Canada, Denmark, France, Germany, England, Russia, Sweden and the United States were, in 1908, represented among the 12 expeditions which were struggling toward the North pole. Eight leaders were veterans—Peary and Cook of the United States, Hornor of Canada, Ericsson and Rasmussen of Denmark, Charcot of France, Shackleton of England and Geor of Sweden.

Do You Want to Earn More Money Every Year?

Are you headed on the road that leads to success? or are you doing something now and hoping something better will turn up later?

If so, you are doing your employer and yourself an injustice.

The first ten years of your life after the public schools, should be given to learning some profession or business. They are the best years of your whole life, and your future power to earn money and to stand among the best people in any town, depends upon how well you use them.

Should you reach the age of 30, without having learned how to do some one good thing well, you may count yourself a failure, and lead others to say: "If John had only gone to school longer and gotten into business." Remember the saddest of all "what might have been."

Many young persons are doing nothing, or next to nothing, simply because they have not come across what seemed to them good to do for the rest of their natural lives. Ordinary jobbing around does not suit them, and no one seems to take enough interest in them to show them what they can do with profit. Many are brainy, earnest, active in mind and body; all they lack is a chance to show their talents. Of these we ask

Do You Know What a Good Business School Can Do For You?

Investigate. Write for circulars. Ask the president or cashier of your home bank. Ask any business man who has been around a great deal what a good business course will do for you.

Ask us what our school can do for you; or rather what it will enable you to do for yourself. Tell us about you. Tell us how old you are; how much education you have; how you stood in your graded school; whether you have carried papers or earned money in any way, as a lad.

Tell us whether you take a pride in what you do and how soon you do it. Whether your personal appearance is a matter of care to you.

Tell us anything you can to give us a good idea of your character and ability.

Knowing these, we can tell you almost to a certainty what a good business course will enable you to do. We can tell you, because in our eleven-years of varied experience, we have had boys or girls like you, boys and girls of almost the same personal appearance, mental and physical makeup.

If you have made good average grades in your public school work; if you are earnest and willing to work and work hard; if you have faith in yourself; if you have common sense and spunk, you will succeed.

If you will work, and work a little harder than most people, you will succeed far better than the average. Our schools, Baraboo, Janesville and Beloit Business Colleges, attract young folks of more than average ability and get up.

Why? Simply because our experience has taught us that there is always room at the top, but that a lazy one and a never-did-well could not sit on the top even if we helped put him there. In all our advertising we seek for the bright, the earnest boys and girls—and get them.

A good boy can do more with a business course than a bad one; a good boy can do more with anything than a bad one.

And when we put behind a good boy or girl, our thorough business training, and all our experience, work, and reputation, we know what his success will be.

Getting a business training does not mean simply getting a knowledge of bookkeeping, shorthand and type-writing.

A good school—one whose managers know their business, and are honest and sincere—can give you vastly more than this.

They can develop into habits those traits in you which make for business success. They can show you what it is that most business men desire and train you for it. They can give you a knowledge of the way and habits of the business men, and teach you how to profit by them. They can teach you that a peculiar man is the easiest man in the world to get along with—if only you remember his peculiarity. They can show you that willingness and earnest effort above all things will win. And above all this, a good school can place you in a good position; for every business man, however large, knows the good school and depends upon it. In these good times no good school can enroll enough students to even satisfy the demand for earnest, willing workers.

The success and progress of our schools and students are a direct proof of this.

Sixty-three good students have been placed in good positions since Christmas, and almost every one was placed because some business man asked for him. And today, we have not one student who is ready for a position.

Last week we placed three bright young ladies with three factories in Janesville and could place two more today, and three young men, if we only had them.

These 83 young folks came to us direct from school, some from teaching, clerking, telephone work; others had been out of school some time. All desired to make a splendid living 12 months in the year, and to have boundless opportunities before them.

You can do the same. Prepare your mind and the position is sure.

Coming to our school is not like going among strangers. We become acquainted first through correspondence; and if not too far away, will call upon you personally. Our social life is pleasant and we have just enough of it to give our students relaxation from their work.

Look over your acquaintances and see if some friend of yours has not made good success of business training. Let us tell you what our girls and boys are doing. We have in mind three young ladies who in less than six months from school are earning \$85 a month, and all three were getting \$35 as teachers.

One young man in less than 15 months is earning \$1,300 a year and he is only 23 years old. Think what he'll earn by 30!

We tell you this to show you the possibilities, but get all the facts by writing for our Journal. It will show you your success. Seize the opportunity.

And we, W. H. and C. B. Williamson, personally will help you seize it. We will give you all our help in school and out. We will always be beside you to show you how to work; and finally we will introduce you to some business man who wants your services.

Only Two Days More Left, Friday and Saturday

We are proving to the entire satisfaction of the many that have attended that we have just what we claim, the equal if not the best Flour in the city. Do not let this opportunity go by!

As a special inducement given by our millers we offer you the

FALCON FLOUR

For Friday and Saturday

At \$1.50 Per Sack

One sack only to a family

It is made of all No. 1 old hard wheat. You are now paying from \$1.70 to \$2.00 per sack for Flour not as good.

Who is Going to Win the \$10 in Gold Offered Below?

QUALITY OF FALCON

The Columbus Laboratories of Chicago made the following test using the best patent flour made as a standard by which to test Falcon:

CHICAGO, Aug. 25, 1908.

SHANNON & MOTT COMPANY, Des Moines, Iowa.

Dear Sirs: We beg leave to report on Comparative Flour Test as follows:

	Standard Spring Patent.	Sample Number 6941
Gluten—Per Cent	10.5	10.2
Ash—Per Cent	15	16.2
Absorption—Per Cent	62	62
Color	100.0	100.0
Loaves Per Barrel	100.0	100.0
Size of Loaf	100.0	100.0
Quality of Loaf	100.0	100.0
Average Value	100.0	98.5
Fermenting Period	100.0	101.5
Quality of Gluten	100.0	101.5

NOTE—In the above report the gluten and the ash are expressed as parts in each one hundred parts of the flour. The ab-

sorption is the amount of water necessary to add to one hundred parts of the flour to make a dough of standard stiffness. The remaining values are so expressed as to show the relations to the standard flour which for the purpose is given a value of 100 per cent. The loaves produced are made under carefully controlled and uniform conditions and baked in accurately graduated baking cylinders in an electric oven. The value expressed as quality of loaf is based upon the color, flavor and texture of the bread. The AVERAGE VALUE expressed in per cent is the mean value, of color, loaves per barrel, size of loaf and quality of loaf. It should not be taken alone in comparing the value of flours, but each of the factors of which it is made up should receive consideration.

GENERAL REMARKS: 6941 is sample marked Falcon. Aug. 22, 1908. Very respectfully submitted,

THE COLUMBUS LABORATORIES.

PRESIDENT TAFT URGES PEACE

PRESIDENT TRIES TO GET TARIFF
CONFERENCE TO SETTLE
FIGHT.

NO AGREEMENT IS REACHED

Dinner at White House a Harmonious
Affair But Free Raw Materials
Issue Is Not Settled by the Re-
publicans.

Washington, July 22.—While no definite agreement was reached it is believed to-day that the dinner given to the tariff conference last night at the White House may result in bringing the fight over raw materials to an end before to-morrow and a report on the bill may be made. President Taft is known to have urged a settlement, but the dinner came to a close without any adjustment being arranged.

Only one question was determined beyond appeal and that was that the conference will have to settle their own differences. Points were taken, however, to convey the impression that this decision is not indicative of any absence of appreciation of the president's efforts.

Split on Raw Materials.

Senator Aldrich spoke for the senate and Speaker Cannon and Representative Dwight, the Republican whip, for the house. Mr. Dwight spoke of the insurgent movement organized by the "anti-free-raw-material" faction in the house, but he was not ready to estimate the strength of this element. Representative Payne expressed the opinion that a conference report carrying from iron, ore, coal, hides and oil could be adopted in the house, but he said that he had not canvassed the situation.

Senator Aldrich was positive in the opinion that such a report would fail in the senate.

The senate court and the corporation tax amendments were discussed at length.

Dinner a Historic Event.

President Taft's dinner probably will be written down in history as one of the most significant events of a purely political bearing that has ever transpired at the White House. The dinner was served on the western terrace, or roof of the low lying structure which connects the White House proper with the executive offices.

Only the Republican members of the committee were present. Senator Cullom of Illinois, who is detained at Atlantic City because of the serious illness of his wife, being the only absentee. From the senate came Senators Aldrich, Hale, Burrows and Penrose. From the house were Messrs. Payne, Daboll, McCall, Houtell, Caldwell and Fordney.

Conferees Get Together.

The conferees worked diligently throughout the day to prepare a program for discussion with the president and his advisers. They started off at the morning session with the five big propositions which have caused the greatest worry and to dispose of which the president's aide has been involved. These five propositions are the proposed placing on the free list of hides, iron ore, oil and coal and a material reduction in the rate of duty proposed on lumber. No trace of the ill feeling which was manifested on the Monday was apparent in the proceedings. President Taft is given the credit for the friendliness of the "dove of peace" which hovered over the conference chamber.

FRENCH CABINET CRISIS OVER.

President Fallieres Offers the Pre-
miership to Leon Bourgeois.

Paris, July 22.—President Fallieres to-day offered the premiership to Leon Bourgeois, former minister of foreign affairs. Parliamentary circles foresee that he will decline the honor, as his health is far from robust. Nevertheless, the cabinet crisis promises to be of short duration.

M. Clemenceau, the late premier; M. Dubois, president of the senate, and M. Brisson, president of the chamber of deputies, as a unit, have counseled President Fallieres that M. Briand, minister of justice and worship, is the most available man after M. Bourgeois, and it is understood that M. Briand is the president's second choice.

Immigration on the Wane.

Washington, July 22.—The tide of immigration into the United States is on the wane. A falling off of 23,369 or approximately 20 per cent. in the number of immigrant aliens admitted into all ports for the month of June as compared with May last is shown by statistics made public by the bureau of immigration of the department of commerce and labor.

Willoughby Gets Census Job.

Washington, July 22.—Announcement of the appointment of William Franklin Willoughby of Alexandria, Va., at present secretary of state of Porto Rico, as assistant director of the census bureau at a salary of \$5,000 a year, is made. Mr. Willoughby, who has sailed from Porto Rico, will assume his new duties in a few days.

Consolation of Wise Men.

It is from books that wise men derive consolation in the troubles of life.—Victor Hugo.

HIPPOS ATTACK ROOSEVELT.

Former President Kills Two of Beasts
Surrounding His Boat.

Nalvasha, British East Africa, July 22.—Col. Roosevelt had an exciting experience while endeavoring to secure a cow hippopotamus. At nine o'clock in the morning he went out on Lake Nalvasha in a rowboat accompanied by two natives. After rowing out some distance from shore the boat was surrounded by a dozen hippopotami, which attacked the boat, some of them diving under and striking the bottom with their heads.

The natives became terrorized, but Mr. Roosevelt was not dismayed, and, selecting the finest bull and the largest cow, shot them dead. Eventually the rest of the animals were driven off, Mr. Roosevelt arriving at camp at three o'clock in the morning, after towing home the spoils with a launch which was sent out to search for the rowboat.

Kermitt Roosevelt has arrived at Nalvasha, but the rest of the expedition will not reach here until to-day. Edmund Heller, the zoologist of the expedition, caught a 200-pound leopard in a wire trap while shooting.

ADDS TO CLARKSON MYSTERY.

Discovery Made That Kenosha Judge's
Office Was Robbed.

Kenosha, Wis., July 22.—The strange disappearance in the week in connection with the search for Judge Joseph R. Clarkson came when it was learned that the offices of Linker & Clarkson, of which the missing man is the junior partner, had been entered seemingly by burglars Sunday night. Valuable papers were strewn about the tables in the offices, but nothing was taken.

The entrance to the private offices leading directly to the home of Judge Clarkson, and while this fact was known on Monday, it was closely concealed as it was thought that it might be of value in the solution of the mystery attending the continued absence of the attorney.

Abundant funds are being furnished for the case by the friends of the Clarkson family, but the search is a halfhearted one on the part of most of the people, as they do not believe that anything will be found until the missing man is ready to divulge his hiding place.

WRIGHT MAKES FAST FLIGHT.

Sends Machine Through the Air at
High Speed.

Washington, July 22.—In two short flights in the Wright aeroplane at Fort Myer, Va., Orville Wright closely approached the world's aeroplane speed record, attaining an average velocity of 54½ miles an hour as computed by Wilbur Wright, who held the stop watch on the machine for half a dozen rounds of the course.

On the first flight the air craft remained aloft only one minute and thirty-five seconds, the aviator being forced to descend by losing a cog wheel on the magneto after making his second round of the course. On his second flight, after the cog had been replaced, the aeroplane swiftly circled a dozen times around the course, which is five-sixths of a mile in the circumference. Certain changes in the gearing of the motor and propellers, which were intended to give the machine a higher speed, had been effected earlier in the day.

Topeka Merchant Arrested.

St. Louis, July 22.—Edward L. Zanditon, a general merchant of Topeka, Kan., who was indicted by a St. Louis grand jury on a charge of obtaining goods from wholesalers and jobbers on alleged false financial statements, has been arrested here.

South Dakota Bank Robbed.

Redfield, S. D., July 22.—The state bank of Redfield, south of here, was robbed. The safe was blown and \$1,000 taken. Three men were in the gang, and it is thought they escaped on an early morning train.

Indianapolis Invites Taft.

Indianapolis, Ind., July 22.—Mayor Hooker sent to President Taft an invitation to be present at the International automobile races that will open the new Indianapolis speedway on Aug. 13, 20 and 21.

Receives Delayed Bravery Medal.

Ann Arbor, Mich., July 22.—Capt. Joseph Kemp, a civil war pensioner, has just received from Washington a bronze medal authorized by congress in 1864 for bravery at the battle of the Wilderness. As a member of Company F, Fifth Michigan volunteers, Kemp dashed into the ranks of the enemy and captured the flag of the Thirty-first North Carolina regiment.

Four Save Negro from Mob.

Atlanta, Ga., July 22.—The bravery of Sheriff McKinney and three deputies, who, with drawn revolvers, faced a mob of 1,000 angry men at Vainings, Ga., saved the life of Will Webb, a negro, who had just been identified by Mrs. Edna Brown as the negro who assaulted her.

Would Enjoin Elwood Strikers.

Indianapolis, July 22.—A bill for an injunction against the striking employees of the American Sheet and Tin Plate Company at Elwood, Ind., was filed in the federal court. The court refused to take immediate action and a hearing will be held before United States Circuit Judge Baker at Goshen.

Appointed Advisers to Indians.

Washington, July 22.—With a view to assisting and advising the Indians in Oklahoma in looking after their property, a number of Oklahomaans were appointed to perform such duties by Acting Secretary of the Interior Pierce.

UNION BUILDING DEDICATED.		
International Headquarters Structure Indianapolis Is Opened.		
Indianapolis, Ind., July 22.—The new International Union Headquarters building was dedicated in this city to-day. A thousand representatives of labor of the United States and Canada attended the exercises. Most of the delegates were from the local unions of the United Brotherhood of Carpenters and Joiners, which is the owner of the building, but other organizations also were represented.		

The International Brotherhood of Teamsters and the Barbers' International union are to have their offices in the building. The Typographical union and the Mine Workers of America have national headquarters here, but they are to continue their present offices. The building dedicated today is the first in this country built solely for the use of labor union offices. Its cost is \$100,000.

BOSTON SHOE THIEF
GETS YEAR IN JAIL

Joseph Donahue, Who Stole From Be-

litt Shoe Company, Brought

Here On Way To Prison.

One year in prison is the penalty

which Joseph Donahue, of Boston, a

shoe cutter, who applied for work in

Beloit, must pay for stealing two pairs

of unfinished ladies' shoes from the

Foster shoe factory in Beloit. Deputy

Sheriff Floyd Carter brought him to

Janesville from Beloit last night and

this morning Sheriff Schellert went

with him to the prison.

The theft was committed Tuesday

afternoon while the Buffalo Bill's

circus was in Beloit. The shoe com-

pany had closed for the afternoon to

allow the employees to attend the

show and the carnival which is being

held in the Line City. Donahue had

applied for a position at the factory

and had been turned away, and after

the shop was closed he broke into

the place and secured the footwear.

In attempting to sell the stolen ar-

ticles, the goods were recognized by

an employee of the factory who as-

sisted the police in capturing Donahue.

District Attorney John L. Fisher

presented the case in Judge Rosa's

court yesterday morning and the evi-

dence against the man was so strong

that he pleaded guilty and received

his sentence.

In Boyhood Days.

Among the Janesville people who

went to Beloit Tuesday to attend the

circus given there by Buffalo Bill and

Pawnee Bill, was W. E. Clinton of

this city, an old-time friend of Paw-

nee Bill. Mr. Clinton and Pawnee

Bill, whose real name is Gordon L. B.

he, were raised together in Bloomington,

Ill., and were great chums to-

gether. Both had musical talent. L. B.

he on the guitar and Mr. Clinton on

the harmonica, and together they ser-

vaded the young ladies of their native

city. Since that time they have drift-

ed apart but Mr. Clinton has never

lost sight of his friend, L. B., after

leaving Bloomington, went west and

lived among the Indians and later

took up his present profession. In

which he has won fame.

RESPECTED RESIDENT
OF EVANSVILLE DEAD

Nathan Frantz Passed Away Wednes-

day Morning At Advanced Age

Of Ninety.

[SPECIAL TO THIS GAZETTE.]

Evansville, July 21.—Nathan Frantz,

a resident of this vicinity for many

years, died at the home of his daugh-

ter, Mrs. Anford Jones at half past

nine o'clock last evening, aged ninety

years. His death was due to general

weakness resulting from his advanced

age and he passed away sitting in his

chair, the going being as a quiet sleep.

Mr. Frantz was born in Monroe coun-

ty, Pennsylvania, July 10, 1819 and

his boyhood days were spent in the

Keystone state on a farm which has

been in possession of the Frantz fam-

ily for more than two hundred years.

When he grew to manhood he became

a teacher and later went into the mer-

cantile business which he conducted

until the troublous times of the war in

1861. He then came westward and

settled in Beloit, Wis. and after a

short residence in the Line city, went

to Oregon, Ill., but remained there

only two years when he returned to

Wisconsin and lived in the country

near Evansville until he retired from

farm life and moved to this city.

Thirty-three years ago. On Septem-

ber 5, 1846, he was married at Kunk-

letown, Penn., to Miss Emily Knudde

who died August 26, 1902. At the age

of twelve years he united with the

German Lutheran church, but changed

membership to the Methodist Episco-

pal church more than half a century

ago and was always in attendance at

services until prevented by extreme

feebleness. It was on Easter Sunday

that he was for the last time able to

attend public worship. He was a

deep thinker and a great student of

the Bible, a man of genial disposition

and great kindness of heart. He en-

joyed the respect and confidence of

all and the community to be better

for his having lived in it. Mr. Frantz

was one of a family of thirteen chil-

dren and two aged sisters, Mrs. Mar-

tina, Susan, Mrs. of Eastern Penn-

sylvania, and one brother, Perry,

Frantz, of Mountain Home, Pennsylv-

ania, are still living. Besides these

he leaves to mourn for their loss four

sons and three daughters: Joshua

and Livingston of Evansville, John

of Joliet, Ill., and Luther of Bel-

levue, Ill.; Mrs. Nettie Jones of New

York City, Mrs. Anford Jones of Ev-

ansville and Mrs. Lizzie Glavo of

Chicago. The funeral services will

be held at the home of Mrs. Anford

Jones on Garfield Avenue, tomorrow

afternoon at two o'clock. Rev. T. W.

North will conduct the services and

will take for his text "Let Me Die

The Death of the Righteous, and Let

My Last End Be Like His," a verse

which the deceased selected to be used

on this occasion.

Mrs. Anron Jones, accompanied by

Mr. and Mrs. William Garfield of

Brooklyn, left yesterday for Janes-

ville, Iowa, where they go to visit

Mr. and Mrs. Philip Cadwallader and

other relatives.

Mrs. O. H. Hendricks and son Gor-

don, returned to La Crosse, last evening,

having been guests at the home of

Mr. and Mrs. George Noyes for a few

days.

Miss Emma Albertie died about

four o'clock Tuesday, p. m., after an

illness of several months of tuber-

culosis, aged seventeen years. Miss Al-

bertie has made her home with her

grandmother, Mrs. Cynthia Albertie

and has lived in Evansville from child-

hood. Arrangements for the funeral

have not as yet been made.

Mrs. William Austin and grand-

daughter, Miss Lela Acheson and

Charles Doolittle go to Reedburg

today to spend a week at the home of

Harry Austin and family.

Rev. Davis, formerly of this city is

here from Milwaukee and is being

entertained at the home of Mr. and

Mrs. Edgar Smith and other friends.

The Misses Zeta and Florence Webb

were the guests of Mr. Ray Silver-

thorn at Footville, Sunday.

Mr. and Mrs. Wm. Bahlring visited

her sister at Beloit last Sunday.

F. L. Dean of Ladysmith is visiting

his daughter, Mrs. Chas. Sheel.

Miss Lena Johnson of Highland

Park, Ill., is visiting her parents.

Mrs. Bertha Ehringer and Mrs. El-

la Ellis are visiting in Chicago.

Mrs. Levi Ellis, sister and brother-in-

law, who have been visiting here, re-

turned to their home at Scranton,

Penn., Wednesday.

Those from here who attended the

show at Beloit, were Allen Long, Wes-

ley Sedgwick, John Sheehan, John

Borkenhagen, Mr. and Mrs. Sherman

Raymond, Miss Frank Sheehan, Miss

Lizzie Taylor, Mrs. Ellen Holmes and

her two nieces from Green Bay.

IN DER FÜRRE PLATZ

The Evening Chit-Chat

By RUTH CAMERON

AN EMPTY life can never be a happy one. But neither can an overworked one.

Too many people live their lives like the tourist who does Europe in three months. They crowd in so many things that they enjoy nothing.

I used to think that a life in which absolutely every moment had its duty or pleasure planned for, was ideal. But I have changed my mind. I know now that the passive unproductive moments are as needful for continued happiness and utility as the follow year for the farmer's field.

The pleasures one has to crowd and tumble over each other usually lose half their value in the process.

Did you ever plan to crowd two pleasures into the room of one by accepting two invitations for the same afternoon or evening without spoiling both?

You hurried regretfully away from one event just when you were having the nicest possible time, when the fun was at its height or the most interesting number on the program was about to take place.

You arrived at the other mentally, if not physically, breathless and found everything on the wane—the people you wanted to see gone, the conversation, the bubbling died away from the champagne of the evening's gaiety.

It is sometimes hard to make a choice. Unless you are of the wise kind who never look back, you are painfully apt to be sure the pleasure you refused was the greater. But when Fate comes to you and says "Which hand," if you greedily say "Both," I think she's decidedly apt to play the trick of giving you the full contents of neither.

There is no doubt but that Americans are more the victims of their overcrowded lives than any other people.

It is one of the things that strikes the foreigner with amazement when

"A little less food well chewed," says Horace Fletcher of Fletcherizing fame, "will afford far more nourishment than twice as much eaten hurriedly."

I wonder if to some degree "Fletcherizing" one's pleasures may not be the secret of happiness.

FIRST PICTURE PUBLISHED OF THE LABOR UPRISING IN HAWAII. High Sheriff William Henry, at left, with his hand on the prisoner's shoulder, Yamashiro, one of the alleged Honolulu conspirators, at right.

(By Special Correspondent.) Honolulu, July 8.—The recent labor troubles in Hawaii, which threatened for a while to be of international importance, are rapidly settling down and those in authority have the mat-

ter well in hand. Yamashiro, the editor of one of the principal Japanese papers, was arrested in his office for alleged conspiracy to excite revolt among the Japanese laborers.

High Sheriff William Henry is a well-known character in Honolulu and all over the island. He is equal to any emergency and ready for any fray.

In Pairs. Life is marked by disappointments, and sometimes these come in pairs. A worthy Camden woman seeking a pension as a widow has found that her husband is enough alive to be drawing a pension himself.—Philadelphia Ledger.

JUST LIKE HEAVEN. "Hambro—Hambro and I look like one. He has just back from his summer trip. Hambro—Dat so? Did he travel first-class? Hambro—First-class? Well, Ah reckon he did. He came all the way from Georgia in a mule cart!"

They Were Out of It.

"Gentlemen," said the man who had mounted a box on the shady side of the postoffice and gathered a little crowd around him, "the object of this meeting is to express our dissatisfaction with Congress for its dilatory tactics regarding the new tariff rates. Months have gone past since the subject was taken up, and it is not settled yet. Meanwhile business is at a standstill. The man here on my right must be among the sufferers. When I get through with my talk I shall ask him to make a few remarks."

"But I am in the tea business and have nothing to say," replied the man.

"That I see. Then I will call on the man on my left."

"Oh, I'm in the undertaking business, and it was never better," was the answer.

"Um, um! Then I shall call upon the patient who is facing me. Something tells me that this delay in the tariff is making him suffer."

"Not if I know it," responded the man. "I'm in the milk business, and when I can't get 20 per cent of water without a customer kicking, have I any reason to kick? I am no hog, sir."

"I see. I was mistaken. There is not a patriot in the crowd, and my speech ends right here and Congress can play the fool for the next five years in quest for all of us. Good afternoon and go to Texas!"

FORTY YEARS AGO

Janesville Daily Gazette, July 22, 1869.—A Common Mistake.—People not infrequently ask for what would be their rule if granted. We were strongly impressed with this fact in a brief visit to the police court this morning. Two ladies of Celtic origin who had evidently had some disagreement, were seated at a little distance from each other and contrary to their usual custom (!) commenced a little wordy sparring which grew to be quite lively. An officer ordered them to be quiet, when one of the women, whom Knowles would not have taken for a model of Venus, broke out with—"It's only justice I want Mather Kimpstulk." The truth was that that was the particular article that she wanted a very limited amount of. This was not a singular case in this particular.

ing within the city limits.

The Wrong Name.—In our notice of the accident at the shop of Morse, Hanson & Co., which we made yesterday, we were misinformed in respect to the man injured. It was James Dimphey. His little finger on one hand was cut off and the other fingers on the same hand considerably cut, while a deep wound was inflicted on his palm.

Tragedy at Beloit.—Two Officers Shot.—Last night, while in the discharge of their duty, Deputy Sheriff Parsons Johnson and Constable Howley of Beloit, were shot by a desperado whom they were endeavoring to arrest. The man who did the shooting was a burglar who had been caught and was in charge of the officers on their way to the jail. Mr. Johnson was a little in advance of Howley and the prisoner was shot in the leg by the rascal who immediately turned upon Howley and fired a pistol into his abdomen, inflicting a wound which is supposed to be mortal. The rascal then ran and made his escape. A reward of 300 is offered for his apprehension.

Genius. Genius even, as it is the greatest good, is the greatest harm.—Emerson.

Martyrs to Science.

At Lisbon, during the plague, Dr. Camara Pestana was infected while searching for plague in a person supposed to have died of pneumonia. It was plague; and the intrepid searcher died also. He wrote down his horrible symptoms to the very end, for the benefit of medical science.

Reasonable Explanation.

The reason a poor man wants to be rich is so he could spend his money; the reason a rich man doesn't want to spend his money is so he won't be poor.—New York Press.

If you have real estate to sell, don't try to make special appointments with "time and tide" which "wait for no man," but "break into the market" through a classified advertisement.
